“Thinking about Thinking”

All About Questions!

Thinking is not driven by answers but by questions

Dead Questions Reflect Dead Mind

I WOULD RATHER HAVE
QUESTIONS THAT CAN'T BE
ANSWERED THAN ANSWERS
WHICH CAN'T BE
QUESTIONED.

Critical Thinking in Everyday Life: 9 Strategies

Most of us are not what we could be. We are less. We have great capacity. But most of it is dormant; most is undeveloped. Improvement in thinking is like improvement in basketball, in ballet, or in playing the saxophone. It is unlikely to take place in the absence of a conscious commitment to learn. As long as we take our thinking for granted, we don't do the work required for improvement.

Development in thinking requires a gradual process requiring plateaus of learning and just plain hard work. It is not possible to become an excellent thinker simply because one wills it. Changing one's habits of thought is a long-range project, happening over years, not weeks or months. The essential traits of a critical thinker require an extended period of development.

6 stages to become a critical thinker

1. The Unreflective Thinker

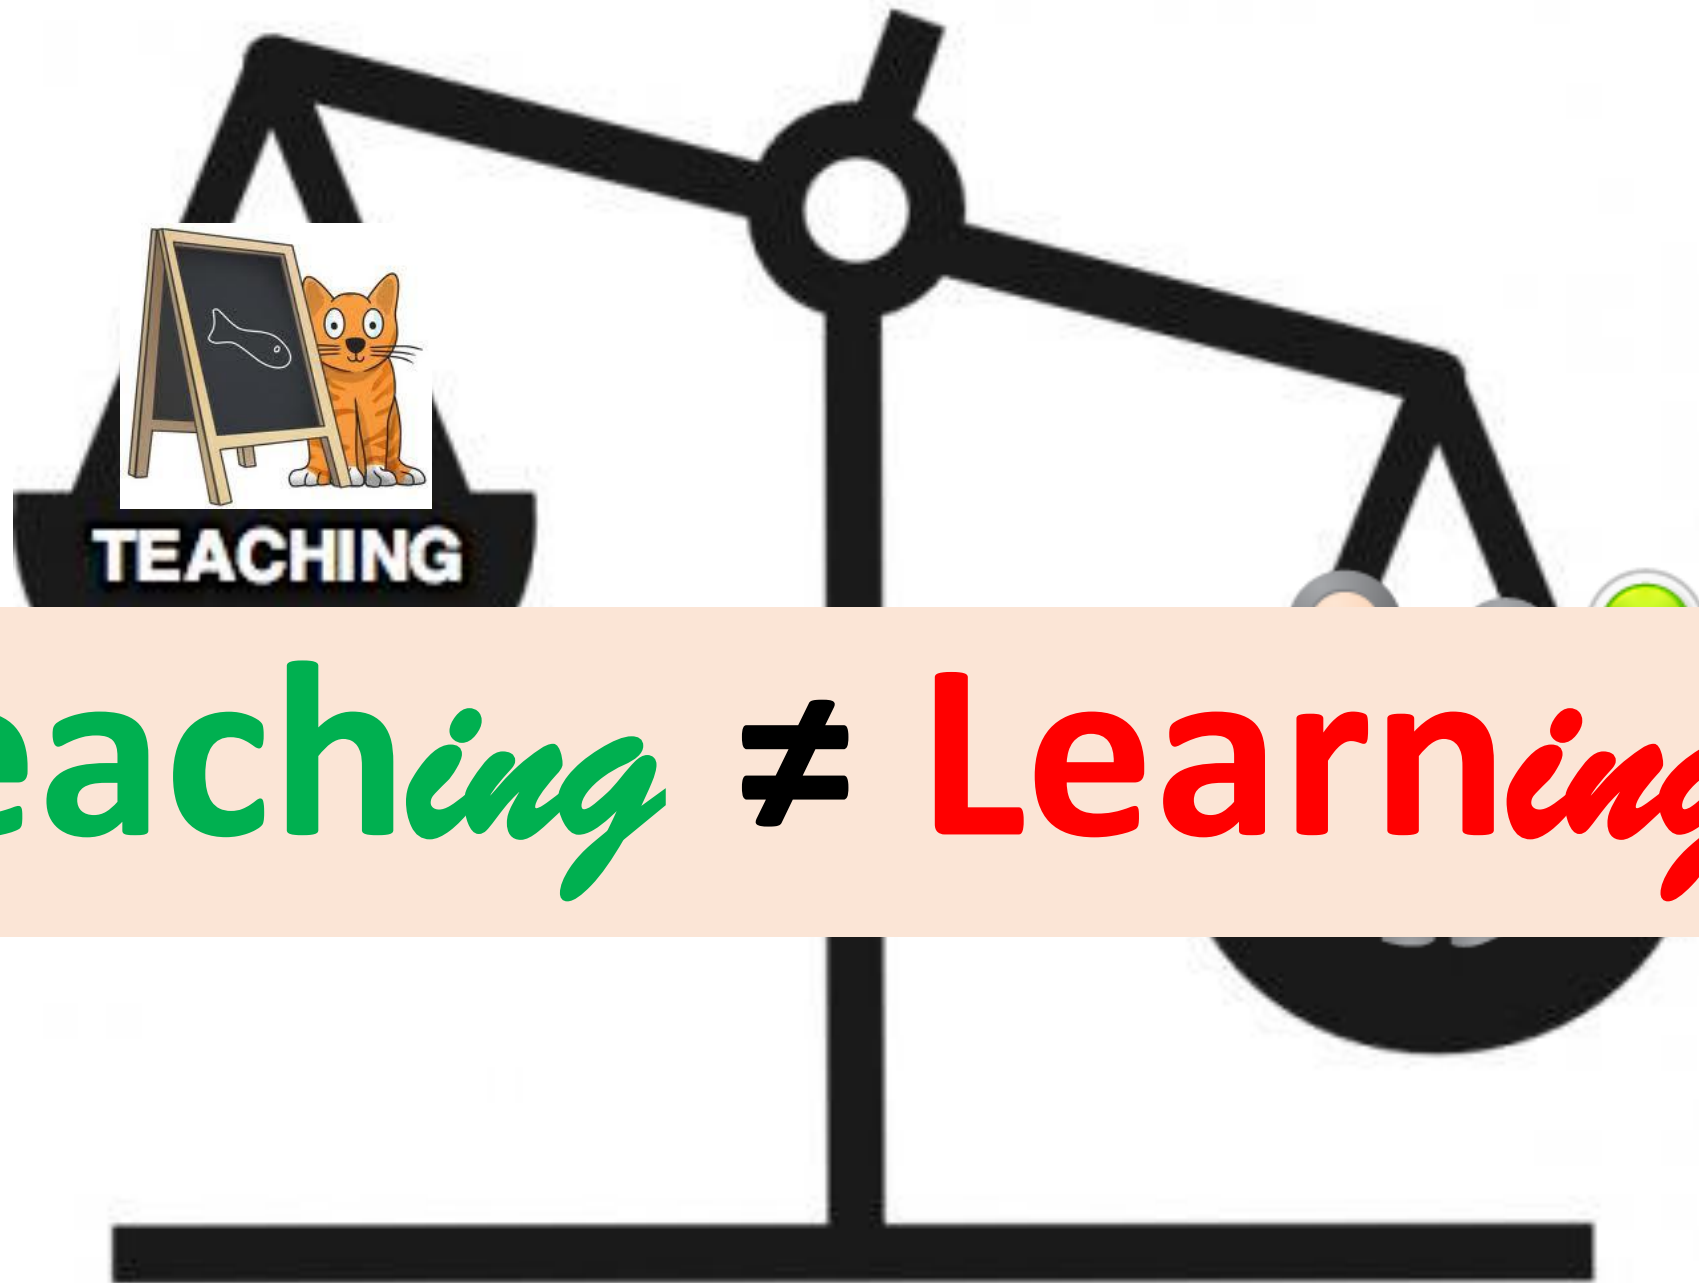

2. The Challenged Thinker

3. The Beginning Thinker

4. The Practicing Thinker

5. The Advanced Thinker

6. The Master Thinker
